## 2 Komentář

Obsah Statistické ročenky České správy sociálního zabezpečení (ČSSZ) za rok 2010 zahrnuje jednu z hlavních činností instituce - oblast důchodového pojištění. Obsahově navazuje na předchozí ročníky.

Podrobný pohled na oblast důchodového pojištění je doplněn základními informacemi demografického charakteru a údaji ilustrujícími některé fáze zpracování důchodové agendy. Demografické údaje jsou čerpány z dat publikovaných Českým statistickým úřadem.

Údaje v ročence odpovídají stavu ke 31. 12. daného roku, není-li uvedeno jinak.

Publikace má dvě základní tabulkové části:

- **kapitola 8 (informace o vyplácených důchodech)** popisuje kolik důchodů, jakého druhu, komu a v jaké kombinaci bylo vypláceno k 31. 12. 2010,
- **kapitola 9 (informace o přiznaných důchodech)** popisuje kolik důchodů a jakého druhu bylo přiznáno důchodcům v roce 2010.

Dvě výše uvedené základní části ilustrují soubor důchodců z pohledu pásem výše důchodů, pásem výše věku důchodců a u přiznaných důchodů i pásem výše osobního vyměřovacího základu, ze kterého byl důchod vyměřen (§ 16 zákona č. 155/1995 Sb.). Soubor vyplácených důchodů je též popsán v členění podle krajů (dle NUTS 3), průměrné výše, průměrného věku důchodce a podle druhu důchodu. Sestavy zároveň ilustrují zastoupení žen a mužů. Dále jsou k rozložení souboru důchodců k dispozici i informace o některých kvantilech, tedy o tom, kolik procent důchodců z celku má důchod nižší než je uvedená hodnota výše důchodu. Vedle mediánu, který soubor důchodců rozděluje na dvě části (50 %), jsou uvedeny i hraniční hodnoty kvantilů. Tyto údaje ilustrují starobní a invalidní důchody vyplácené sólo.

Ročenka rovněž informuje o počtu zaniklých důchodů v roce 2010, ukazuje zániky podle druhů důchodu a podle druhu zániku.

Údaje o příčinách invalidity rozšiřují informace o přiznaných invalidních důchodech. Data jsou tříděna podle 19 skupin diagnóz, které jsou definovány Světovou zdravotnickou organizací (WHO) - viz 10. decenální revize Mezinárodní statistické klasifikace nemocí a přidružených zdravotních problémů.

### Změny od 1. 1. 2010

Koncepce invalidních důchodů i invalidity jako takové se mění. Zákon již nerozeznává dva druhy invalidních důchodů - plný a částečný. Nově je osobám z důvodu jejich invalidity poskytována jediná dávka důchodového pojištění - invalidní důchod. Její výše je rozdílná podle toho, který ze tří stupňů invalidity u konkrétního pojištěnce nastal. Do těchto invalidních důchodů v novém pojetí se k 1. 1. 2010 podle přesných zákonných pravidel transformovaly i plné a částečné invalidní důchody přiznané v období do konce roku 2009.

Pokud dosáhne důchodce věku 65 let, je mu invalidní důchod automaticky převeden na starobní důchod vzniklý transformací z invalidního. Výše důchodu se v tomto případě nemění. Jednorázově bylo k 1. 1. 2010 takto převedeno do starobních důchodů cca 109 tis. invalidních důchodů, což zvyšuje počty vyplácených starobních důchodů oproti předcházejícím rokům.

Do roku 2009 byly v tabulkách přiznaných invalidních důchodů zahrnuty jak nově přiznané invalidní důchody, tak změny mezi druhy invalidních důchodů. Nyní nejsou změny stupňů invalidního důchodu v přiznaných důchodech zahrnuty. Počty přiznaných důchodů jsou naopak navyšovány o průběžné transformace invalidního důchodu na starobní důchod.
